

How to Correctly Commit and Push

Step-to-Step

1. **Pull** (to get HEAD revision)
2. Do changes locally
3. Commit change to local repository(**Commit**)
4. repeat 2-3 as often as necessary
5. Before wanting to push the commits you **MUST Pull**

Pulled without Conflicts (No Changes, Merge without Conflicts)

6. **Push** to upstream
7. Done

Pulled with Conflicts (Merge without Conflicts)

1. 6. resolve merge conflicts(rightclick->Team->Merge Tool)
8. add resolved files to index(rightclick->Team->Add to index)
9. **Push** to upstream
10. Done

Note

Only upload source files (**DO NOT UPLOAD BINARYS**)
